

Building Better Green Star Application Form

Building Better means using sustainable building approaches or purpose built features to promote a healthy environment.

A Green Star helps the public to identify the projects in our community which are built better through the use of green infrastructure.

Coquitlam wants to recognize the developers, builders and businesses in our City who are using innovative building approaches to support our natural resources too.

The Building Better Green Star can be used on project signs, brochures, websites and any promotional material associated with a project which uses one or more building better approaches.

Fill out the information below and submit this form to Development Servicing in person or by email at dvptservicing@coquitlam.ca. Be sure to include a contact email so that we can send you a Building Better green star logo.

Company: _____

Project Address: _____

Email: _____ **File #:** _____

Please check which of the following building better approaches were used on your site:

- | | |
|---|--|
| <input type="checkbox"/> Absorbent or Topsoil (300mm min) | <input type="checkbox"/> Roadside Infiltration Trenches or Swales |
