## 1 REQUEST FOR EXPRESSIONS OF INTEREST

### 1.1 Introduction

The City of Coquitlam ('City') is seeking expressions of interest from businesses interested in operating as street vendors ('Operators') on designated City owned properties. The successful Operator(s) will provide food services and/or sell other products from self-contained street vending vehicles or street vending carts which reflect the needs and desires of the diverse community. 1.4 Applicant Requested Sites

**Applicant Suggested Sites: City owned and controlled property, excluding parkland**

The City may issue up to two (2) more street vending licences for vending **vehicles** or street vending **carts** on City owned or controlled streets, sidewalks and boulevards. Additional information is required to apply for these sites and is outlined in the Application Information and Selection Process section of this document. Please note that the proposed vending sites must be at least 30 meters from any existing restaurant business, or, in the case of a non-food operator, 30 meters from any existing business selling similar products.

1.5 Details of Each Site

The approximate location of each pre-approved Site in relation to City streets is shown on the maps included in [Appendix A - Vending Locations - Maps](#).

These are approximate locations. The exact locations will be set out in a Street Vending Licence of Occupation Agreement between Operators and the City.

1.6 Operator Requirements

Within **15 days** of notification from the City, the selected Operators will be required to:

- a) Provide evidence to the City (e.g., Lower Mainland Food Vendor decal) that the street vending cart or street vending vehicle is in compliance with the Fire Code as determined by the City of Coquitlam Fire Department (refer to [Appendix C - City Inspection Policy – Food Vending Vehicles](#));
- b) Commercial General Liability (CGL) insurance \$2M coverage provided on the [City's Standard Insurance Form](#)
- c) Provide evidence to the City (e.g., Permit to Operate and decal) that the street vending cart or street vending vehicle is in compliance with the requirements of the Fraser Health Authority or Vancouver Coastal Health Authority;
- d) Provide evidence to the City of Automobile Liability Insurance providing coverage for death, bodily injury, property loss and damage arising out of or in connection with the Street Vending Vehicle in an amount not less than \$2,000,000 per occurrence for the street vending cart or street vending vehicle proposed for use in the Street Vendor Program.
- e) Pay to the City the applicable licence fee and taxes;
- f) Pay to the City a \$1,000 damage deposit;
- g) Enter into a [Appendix B – Street Vending Licence of Occupation Agreement](#) with the City once all other requirements have been met.

Failure to meet the above noted requirements may result in the loss of the site and Licence.

1.7 Term

The City intends to enter into one (1) year Agreements at all sites from April 1 to March 31 (the Street Vending Program year). While the licences may be renewed on mutual agreement between the parties, the City will conduct a yearly intake and evaluation of applications to the Street Vending Program.

The City may enter into a less than one (1) year agreement at any site at its sole discretion. Any mid-year licences will be for the remainder of the Street Vending Program year.

1.8 Application Timeline

The City will accept applications to the 2022 Street Vendor Program year until the date noted in the summary of key information. After licences and sites have been assigned through the selection process, applications will be accepted on an ongoing basis until all of the remaining available licences and sites have been awarded for the 2022 Street Vendor Program year.

## 2 APPLICATION INFORMATION AND SELECTION PROCESS

### 2.1 Application Requirements

Interested businesses and entrepreneurs are requested to provide the following information which will be evaluated by the City:

For City Approved Sites:

- a) **Corporate** - Company profile, number of years of relevant experience in similar or other successful operations
- b) **Sites** - Indicate which Site(s) you are interested in **and** which Site(s) are preferred.
- c) **Equipment** - Indicate whether you are interested in operating a street vending cart or street vending vehicle. Provide dimensions, pictures, description and indicate the power source of the street vending equipment. Applicants are encouraged to check the actual size of the available sites to ensure their equipment will fit the area.
- d) **Schedule and Commitment**- Indicate the number of days per week and hours of operation during the Term that you would commit to operating at the Site. Indicate any seasonal variances.
- e) **Marketing** – Provide a brief summary as to why your business would be well suited as an Operator to provide the street vending services to the community for each site. Share your vision and operating principles including, but not limited to:
  - Menu planning, course offerings and quality, or other products if food and beverages are not being sold
  - How you would connect with and involve the community
  - Appearance and presentation
  - Promotion, marketing and placement of services
  - Value Added – what is exceptional about the service, products and Operator(s)
  - Other relevant information
- f) **Sustainability – Describe your ability to minimize environmental impact and provide social and economic benefits to the community:**
  - manage and minimize waste
  - use of compostable supplies
  - sourcing local products
  - energy efficient equipment
  - minimize environmental impact and improve economic and social benefits
- g) **References and Experience- including contact information.**

For Applicant Suggested Sites:

- a) Provide all of the information required for City Approved Sites other than the preferred City Approved Site (i.e., part b) noted above.
- b) **Sketch Plan** – Provide a description of the desired operating location including nearest street address, the vending vehicle or vending cart proposed for use, and include a

diagram (may be hand drawn) showing the proposed location and orientation of the vending vehicle or vending cart at the operating location.

- c) **Operation Plan** – Provide a description of the proposed flow of customers to and from the vending vehicle or cart and the expected mode of transportation of those customers to the site.

## 2.2 Evaluation and Selection Process

The City will evaluate the information provided in the application and rank the applications based on their total evaluation score. The City reserves the right to consider other criteria that may become evident during the evaluation process to provide best value and meet community objectives. The City will give preference to candidates which are business ready. The City may consider whether an applicant fulfilled its commitments made in its application to the Program in previous years (e.g., attended its site, followed the City's bylaw requirements, etc.).

Sites and licences will be offered and assigned based on the ranking of the application evaluations. The highest ranked applicant will be offered its preferred site as noted in its application. The next highest ranked applicant will be offered its preference of the remaining sites available noted in its application. This pattern is followed until the remaining sites and licences have been assigned. If all of an applicant's preferred sites are assigned, the next highest ranked applicant with a preference for an available remaining site will be offered the available site.

If an applicant notes an applicant suggested site within its list of preferred sites, the applicant will retain first priority for that site pending City approval but the next highest ranked applicants with City Approved site preferences that remain available will be offered a City Approved Site.

After licences and sites have been assigned through the selection process, applications will be accepted on an ongoing basis throughout the Street Vending Program year until all of the available licences and sites have been assigned. All licences will expire prior to the beginning of the next Street Vending Program year (April 1).

For the *Applicant Suggested Sites*, the City will consider the following:

- Physically adequate to accommodate a cart or truck. For vehicles, there must be a safe and lawful parking spot that can be occupied for an extended period without detriment to the surrounding facilities and parking availability. For carts, the spots need to be separated from the travelled portions of the sidewalk and road to allow safe passage for pedestrians.
- Sufficient space for patrons. Consideration of whether customers will be walking or arriving by vehicle (or both) factor into determining whether there is sufficient sidewalk/boulevard area for lining up and eating and/or on-street parking for drive-by customers.
- Availability of public trash cans. Although vendors are required to provide a garbage container and keep their immediate area clean, impact on other City sanitation services is considered. It is preferable to find sites with public trash cans within walking and eating distance from the site, particularly for vendors relying largely on walk-up customers.

- Adequacy of street lighting. As the program becomes more robust it is hoped that vending may extend into hours of darkness. For vendor and patron safety, proximity to street lighting is considered.
- Minimal parking impacts. For vending vehicles, it is important that the vendor be accommodated within the existing street parking allowance, without significant impact on others. Vending vehicles need to be sited in ways that will not increase the likelihood of others, such as customers, committing parking violations.
- Compatibility with neighbouring businesses selling similar products. Operators should be aware that:
  - a) Vending vehicles and carts **must** be located at least 30 meters away from an existing restaurant business;
  - b) In the case of non-food Operators, vending vehicles and carts **must** be located 30 meters from any existing business selling substantially similar products.

We thank all candidates for their interest; however, only those short listed will be contacted.

The evaluation will be confidential and no totals or scores will be provided to any of the Applicants.

|                              | <b>REVISED</b>      | <b>August 10, 2015</b> |

#### **PURPOSE:**

To provide guidelines to ensure that mobile food vending vehicles comply with applicable fire safety requirements.

#### **SCOPE:**

All members of the Fire Prevention Division conducting inspections.

#### **DISCUSSION:**

Division A, Sentence 1.1.1.1.(1), states that the BC Fire Code applies to all new and existing buildings and facilities. Although not a defined term within the Code, Appendix reference A-1.1.1.1.(1) states that for the purposes of Sentence 1.1.1.1.(1), “facilities” is used in its broadest sense to include all premises that are not included in the definition of “building” in the Code, such as equipment.

Further, Division B of the Fire Code regulates commercial cooking equipment as follows:

- Sentence 2.6.1.9.(1) states, “Commercial cooking equipment exhaust and fire protection systems shall be designed and installed in conformance with the British Columbia Building Code.”
- Sentence 2.6.1.9.(2) states, “Except as required in Sentences (3) to (5), the use, inspection and maintenance of commercial cooking equipment exhaust and fire protection systems shall be in conformance with NFPA 96, “Ventilation Control and Fire Protection of Commercial Cooking Operations.”
- Sentence 2.6.1.9.(1) also references the BC Building Code. Sentence 6.2.2.7.(1) of the Building Code requires that systems for the ventilation of commercial cooking equipment shall be designed, constructed and installed to conform to NFPA 96.

Based on the preceding discussion, motor vehicles or trailers containing fixed equipment used for the cooking of food producing grease laden vapours are considered as a “facility” and thus are regulated by the requirements of the BC Fire Code.

#### **POLICY:**

The vehicle 'kitchen system' shall comply with the 2008 version of NFPA 96 standard for the installation and maintenance of the kitchen exhaust fan, hood, grease removal devices, cooking appliances and the fire suppression system.

It will be the policy of our department to:

1. Inspect mobile food vending vehicles containing fixed equipment used for the cooking of food producing grease laden vapours to ensure compliance with the BC Fire Code;
2. Conduct inspections of the vehicles on an annual basis; and
3. Track inspections of the mobile food vending vehicles similar to that for buildings.

#### PROCEDURE:

Some discretion shall be applied when inspecting new or existing cooking installations within vehicles. Not all of the requirements listed below will apply in each case. When inspecting mobile food vending vehicles or trailers, the following kitchen system specific rules and general facility requirements apply:

1. The operator shall provide to our department a copy of the following:
  - (a) Installer's verification that the fire suppression system has been installed and tested in conformance with NFPA 96 and is also compliant with ULC 1254.6 - 1995 (standard for "Fire Testing of Restaurant Cooking Area Fire Extinguishing System Units."); and
  - (b) Installer's verification that the exhaust fans, hood, ducts and grease removal devices have been installed in conformance with NFPA 96.
2. The operator shall provide to our department copies of inspection approvals (or other suitable verification) from the BC Safety Authority for:

7. Adequate egress shall be provided for the kitchen preparation area of the vehicle.
8. The vehicle shall be equipped with fluorescent road cones that can be placed adjacent to the vehicle on the side of the truck facing the street (when parked for business.)
9. Annual and semi-annual inspection, testing and maintenance (ITM) for the kitchen hood, ducts, fan and fire suppression system shall be completed as per the frequency and methods identified in the NFPA 96 standard. ### POLICY - Inspections

|                              |                     |                        |

|                              | <b>REVISED</b>      | <b>August 10, 2015</b> |

*10. Exhaust hood, fan and ducts shall be cleaned at required intervals, by an ASTTBC qualified technician and the associated equipment shall be tagged properly after servicing.*

*11. Temporary electrical power installations, including generators, shall be proper gauge, rating, be protected from weather and vehicular traffic and be restricted from public access.*

*12. Tents and awnings associated with the vehicle shall be listed as conforming to ULC-S109, "Flame Tests of Flame-Resistant Fabrics and Films."*

13. The operator shall comply with other applicable City Bylaws.

An inspection of the mobile food vending vehicle or trailer by our department will be required prior to opening for business.

The vehicle identification number (VIN) shall be recorded on the inspection report. Although these vehicles are mobile, the first inspection site (relative property address) of the vehicle will form its permanent location for recording of the first and subsequent inspection records in the FDM RMS property module. For example, the food truck Japadog was first located on the street adjacent to Douglas College in the summer of 2013. The inspection record will be related to 1250 Pinetree Way (the address for Douglas College.) Contact information shall also be recorded in the database relative to the vehicle inspection record.

Recording of the VIN for each vehicle will ensure that we inspect the same mobile unit from year to year.
