

Addendum No. 1

City of Coquitlam

Tender No. 78005

2021 Curb Extension & OSI Improvements

Issue Date: October 20, 2021

(Consists of 4 Pages including FT.5-Rev 1 & FT.6-Rev 1)

Tenderers shall note the following amendments to the Tender documents:

1. Revisions - Schedule of Quantities and Prices:

R1) Correct Pay Item 7.04 – “Removal of Existing Asphalt Flatwork.” from a quantity of **445** Sq.m to a quantity of **755** Sq.m.

R2) Under Pay Item 13.02 – “Supply & Install or Adjust Traffic Signage’, include installation of two additional WA-36R signs at Falcon & Runnel bulges (Page CD 6), in the lump sum amount.

REMOVE:

Form of Tender Pages FT.5 & FT.6

REPLACE WITH:

Form of Tender Pages FT.5-Rev 1 & FT.6-Rev 1

2. Questions and Clarification:

Q1) The drawings on page CD 8 show two curb and sidewalk returns at 1320 Pinetree Way. Can you confirm these are part of the scope of work?

A1) These curb & sidewalk letdowns are not part of the scope of work and will be removed on the IFC drawing set.

Q2) How are delineator removals and delivery to the City to be paid?

A2) The removal of traffic delineators from traffic bulges and delivery to the City are incidental to all other work in the Contract.

Q3) The import granular embankment fill is shown in the SOQ as provisional (Pay Item 7.08). Has the excavation quantity for this item been included in common excavation?

A3) Yes, the excavation quantity includes the possible use of embankment fill on this project.

Q4) Pay Item 4.04 of the SOQ lists a 150mm exposed aggregate driveway transition, but the drawings on page CD 14 show 80mm thickness. Which is correct?

A4) The SOQ description under Pay Item 4.04 is correct (150mm thickness).

Q5) How are junction box adjustments and the City PRV cover/hatch adjustment to be paid?

A5) Adjustment of junction boxes shall be incidental to all other work in the Contract. There shall be no adjustment of the PRV cover/hatch, the surrounding boulevard shall be altered to fit if required.

Q6) How are survey monument removal & re-instatements to be paid?

A6) If a survey monument is found within the work area, the location shall be reviewed by the City's geomatics section to determine if it is required (many locations can now be abandoned or removed without the need to be re-instated). In this case, removal would be incidental to all other work in the Contract. The City will pay separately if re-instatement is required.

Q7) If "blacking out" the intersection at Falcon and Barnet is required to keep the SLAT configuration on Falcon, would the city be responsible for energizing/de-energizing the lights??

A7) Note that the intersection at Falcon and Barnet cannot be "dark" or put into "flash" and must operate continuously. At specific times (outside of lane closure restrictions), lanes may be reduced or turns restricted to allow milling/paving & other activities to occur on Falcon. A Traffic Management Plan shall be submitted to Traffic Operations to review.

End of Addendum No. 1

Tenderers shall take into account the content of this Addendum in the preparation and submission of the Tender which will form part of the contract and should be acknowledged on the Tender Form, Item 1.

Upon submitting a Tender, Tenderers will be deemed to have received all Addenda that are posted on the City's website and deemed to have considered the information for inclusion in the Tender submitted.
