

# HOW TO MAKE YOUR KITCHEN CONTAINER LINER

Turn your food scraps and yard trimmings into compost by putting them in your Green Cart. The contents of your cart are picked up weekly and taken to a regional composting facility where they are turned into high-quality compost for use by landscapers and farmers.

## How to use your Green Cart

1 Collect your food scraps and food-soiled paper in your Kitchen Catcher. You may wrap your green waste in a paper bag (e.g. Bag to Earth) or wrap it in newspaper, but do not use plastic bags (no biodegradable or compostable bags).

2 Empty the Kitchen Catcher into your Green Cart.

### Tip for keeping it clean

Freeze food scraps, such as those from meat or fish, until collection day.

### STEP 1

Stack 3 to 4 sheets of unfolded newspaper on top of each other.

### STEP 2

Fold one corner down to make a triangle. Tear off excess paper.

### STEP 3

Fold point B to the top of the paper to meet at point C and make a crease.

### STEP 4

Fold point A to the top of the paper to meet at point B and C, and make a crease. This will form a square.

### STEP 5

Unfold the last two creases made so the newspaper forms a triangle again. The previous two creases are your guidelines for the next steps.

### STEP 6

Take point A and fold across to meet up with the start of the crease on the farthest side of the triangle.

### STEP 7

Take point B and fold across to meet up with the crease on the other side of the triangle.

### STEP 8

Divide the layers of the newspaper at point C and fold down towards the bottom of the container.

**SEPARATE YOUR WASTE.**
