

FRONTAGE WORKS PROGRAM

TO IMPROVE COQUITLAM STREETSCAPES IN SOUTHWEST COQUITLAM

This program has been developed to modernize and upgrade streetscapes in residential areas throughout southwest Coquitlam. Previously, streetscape upgrades were required for all new development but not for one-for-one replacement of single-family homes. As redevelopment activity has ramped up in southwest Coquitlam, this has resulted in a variety of streetscape standards. Through the Frontage Works Program, all new single-family homes built in southwest Coquitlam will contribute to upgrading the streetscapes to a modern urban standard, including curbs, gutters, sidewalks, lighting, landscaping and rear lane improvements. coquitlam.ca/frontageworks
